Theorizing Praxis investigates the theory/practice relation in philosophy, particularly within the fields of hermeneutics, ethics, and the philosophy of education. In so doing, it uncovers important areas of common ground between hermeneutical and pragmatist philosophy. Paul Fairfield defends a «practice-immanent» method of theorizing, which is indebted to both traditions and aims to explicitly articulate the spontaneously emergent constitutional dynamics of social practices rather than continue the project of transcendental theory construction.

Information Cultures in the Digital Age-Matthew Kelly 2016-08-08 For several decades Rafael Capurro has been at the forefront of defining the relationship between information and modernity through both phenomenological and ethical formulations. In exploring both of these themes Capurro has re-vivified the transcultural and intercultural expressions of how we bring an understanding of information to bear on scientific knowledge production and intermediation. Capurro has long stressed the need to look deeply into how we contextualize the information problems that scientific society creates for us and to re-incorporate a pragmatic dimension into our response that provides a balance to the cognitive turn in information science. With contributions from 35 scholars from 15 countries, Information Cultures in the Digital Age focuses on the culture and philosophy of information, information ethics, the relationship of information to message, the historic and semiotic understanding of information, the relationship of information to power and the future of information education. This Festschrift seeks to celebrate Rafael Capurro's important contribution to a global dialogue on how information conceptualisation, use and technology impact human culture and the ethical

New Media and Learning in the 21st Century-Tzu-Bin Lin 2015-02-25

This volume brings together conceptualizations and empirical studies that explore the socio-cultural dimension of new media and its implications on learning in the 21st century classroom. The authors articulate their vision of new-media-enhanced learning at a global level. The high-level concept is then re-examined for different degrees of contextualization and localization, for example how a specific form of new media (e-reader) changes specific activities in different cultures. In addition, studies based in Singapore classrooms provide insights as to how these concepts are being transformed and implemented by a co-constructive effort on the part of researchers, teachers and students. Singapore classrooms offer a unique environment to study the theory-practice nexus in that they are high achieving, implicitly grounded in the eastern cultural values and well-equipped with ICT infrastructure. While these studies are arguably the state-of-the-art exemplars that synergize socio-cultural and technological affordances of the current learning environments, they also serve as improvable ideas for further innovations. The interplay between theory and practice lends support to the reciprocal improvements for both. This book contributes to the continuing debate in the field, and will lead to better learning environments in the 21st century.

Philosophical Hermeneutics Reinterpreted-Paul Fairfield 2011-08-11

In this important new study, Paul Fairfield examines a number of issues of central importance to philosophical hermeneutics. His aim is less to reexamine the basic hypotheses of hermeneutics (Gadamer's hermeneutics in particular) than to understand it in relational terms, by bringing it into closer association with existentialism, pragmatism, critical theory, and postmodernism. Fairfield contends that there are important affinities and areas for critical exchange between hermeneutics and these four schools of thought which have, until now, remained underappreciated. *Philosophical Hermeneutics Reinterpreted* examines several of these connections by interpreting hermeneutics in relation to specific themes in the writings of key figures within each of these traditions. In so doing, he both clarifies some outstanding issues in hermeneutics and advances the subject beyond

what Heidegger, Gadamer, and Ricoeur have given us.

Clinical Pastoral Supervision and the Theology of Charles Gerkin

Thomas St. James O'Connor 1998-03-30 Analyzes the content of some 300 texts on clinical pastoral supervision written in the past 20 years in light of fundamental questions about the nature and theological method of the praxis of clinical pastoral supervision, drawing on social science, hermeneutic, and special interest approaches and on the theology of Charles Gerkin, a pastoral theologian and family therapist. Theological methods in the three approaches are critiqued and Gerkin's praxis/theory/praxis method is endorsed. Case examples are used

throughout to illustrate theory and aid in the presentation of an adequate praxis. Annotation copyrighted by Book News, Inc., Portland, OR

Public/private-Paul Fairfield 2005 As impressions grow that privacy is under increasing threat, the sphere of private life has needed to reassert itself, yet efforts to this end are beset with numerous difficulties, including the ways in which the private sphere has for centuries been understood and misunderstood. While Public/Private takes up a broadly liberal perspective, it endeavors to reach beyond an audience of liberal theorists to include other political orientations and philosophical traditions. Fairfield examines the ethical-political significance as well as the policy implications of a right to privacy. Discussing the different applications of privacy laws, technology, property, relationships, Fairfield writes in a style accessible to specialists and students alike.

Polis and Praxis-Fred R. Dallmayr 1987-02 This provocative collection of essays seeks to clarify and redefine mainstream political and social concepts whose meaning is problematic. Their touchstone is the relation between polis and praxis - the public-political space and the political action

that maintains and is conditioned by that space. The result is a stimulating and original contribution to current political discourse that explores and advocates the manifold possible levels of active political life below and above the level of the state. In an open philosophical inquiry, the author conducts a dialogue with many of this century's seminal thinkers as he takes up such topics as the plausibility of friendship as a model for political relations, the relation between political praxis and "experience," Heidegger's ontology of freedom, Foucault's treatment of power, and the merits and disadvantages of Habermasian critical theory. Fred Dallmayr is Packey Dee Professor of Government at the University of Notre Dame.

Teachability and Learnability-Paul Fairfield 2016-09-01 Deep disagreements exist regarding what thinking and critical thinking are and to what extent they are teachable. Thinking is learned in some measure by all, but not everything that is learnable is also teachable in an institutional setting. In questioning the relationship between teachability and learnability, Fairfield investigates the implications of thinking as inquiry, education as the cultivation of agency, and self-education. By challenging some of the standard conceptions of thinking, the author explores the limits of teachability and advances critiques of standardized tests, digital learning technologies, and managerialism in education.

Death: A Philosophical Inquiry-Paul Fairfield 2014-09-19 From Nietzsche's pronouncement that "God is dead" to Camus' argument that suicide is the fundamental question of philosophy, the concept of death plays an important role in existential phenomenology, reaching from Kierkegaard to Heidegger and Marcel. This book explores the phenomenology of death and offers a unique way into the phenomenological tradition. Paul Fairfield examines the following key topics: the modern denial of death Heidegger's important concept of 'being-toward-death' and its centrality in phenomenological ideas, such as authenticity and existence the philosophical significance of death rituals: what explains the imperative toward ritual around death, and what is its purpose and meaning? death in an age of secularism the philosophy and ethics of suicide death as a mystery rather than a philosophical problem to be solved the relationship between hope and death. *Death: A Philosophical Inquiry* is essential reading for students of phenomenology and existentialism, and will also be of interest to students in related fields such as religion, anthropology and the medical humanities.

Huck Finn in Italian, Pinocchio in English-Iain Halliday 2009 This book represents an investigation into one of the basic issues in the study of translation: how do we reconcile theory and practice? The main focus, in the

form of close readings and think-aloud protocols in Chapters 2 and 3, is on translations of two classic texts: Mark Twain's *The Adventures of Huckleberry Finn* and Carlo Collodi's *Le avventure di Pinocchio*. The first and last chapters respectively seek to show what translation theory is and what translation practice is. Indeed, Chapter 1, "Theory and Hubris," provides a synthesis of the development of the interdiscipline of Translation Studies, with some consideration also given to the hermeneutical questions that inevitably arise when dealing with the interpretation of language.

Paul Ricoeur in the Age of Hermeneutical Reason-Roger W. H. Savage 2015-12-16 This volume brings together eleven essays that address a range of issues extending from broader questions of social justice to the sexual intimacy that bears the mark of our fleshly existence. Collectively, these essays extend the reach of Paul Ricoeur's early to late works by taking up some of the major social, political and religious challenges facing us in a postmodern, ultrapluralistic world.

The Hermeneutic Tradition-Gayle L. Ormiston 1990-01-01 Here are the major statements of the leading figures in the nineteenth- and twentieth-century German and French hermeneutic traditions--the major statements on the aims, methods, and techniques of interpretation. Some of these appear here for the first time in English. This book establishes the context for contemporary analyses of interpretation. Part I traces the evolution of hermeneutics from Friedrich Ast and Friedrich Schleiermacher through Wilhelm Dilthey to Martin Heidegger's placing of hermeneutics at the center of the ontological analysis of human being. Part II follows the development of the Heideggerian tradition in the writings of Hans-Georg Gadamer. Gadamer's "philosophical hermeneutics" is then located at the center of several important exchanges with more traditional, objective hermeneutical methodologists like Emilio Betti, ideology-critics like Jürgen Habermas, and linguistic-phenomenological thinkers like Paul Ricoeur.

Hermeneutics And Empirical Research In Practical Theology-C. A. Chris A. M. Hermans 2004 The contributors of this volume reflect on the

writings of Hans van der Ven on the foundations of practical theology, the empirical paradigm within practical theology, and specific subdisciplines within practical theology, especially religious education, moral education, church development and ministry.

On Paul Ricoeur-Richard Kearney 2017-07-05 Paul Ricoeur is one of the giants of contemporary continental philosophy and one of the most enduring and wide-ranging thinkers in the twentieth century, publishing major works ranging from existentialism and phenomenology to psychoanalysis, politics, religion and the theory of language. Richard Kearney offers a critical engagement with the work of Ricoeur, beginning with a general introduction to his hermeneutic philosophy. Part one explores some of the main themes in Ricoeur's thought under six headings: phenomenology and hermeneutics; language and imagination; myth and tradition; ideology and utopia; evil and alterity; poetics and ethics. The second part comprises five dialogical exchanges which Kearney has conducted with Ricoeur over the last three decades (1977-2003), charting and explaining his intellectual itinerary. This book is aimed at a broad student readership as well as the general intelligent reader interested in knowing more about one of the most enduring major figures in contemporary continental philosophy.

Writing Diaspora in the West-Peter McCarthy 2009-02-17 In *Writing Diaspora in the West*, Peter McCarthy argues that the surveyors and theoreticians of modern human subjectivity have discovered in the margins a motherland, nourishing and nurturing them in the fantastic culture of what he terms the 'new marginalism'. This culture, McCarthy argues, is the

product of a certain fantasy, the projection of a subjective homeland onto the various margins of discourse, subjectivity, history and geography that goes beyond a Left minoritarian ethos. This fantasy leads to a certain marginal affectivity, a fascination and identification with things perceived at the margins or bounds of a psychopathological homeland, especially with those who live or subsist there. McCarthy's work stands as a challenge to liberal critical orthodoxies concerning the representation of marginal experience.

Being and Time-Martin Heidegger 2008-07-22 "What is the meaning of being?" This is the central question of Martin Heidegger's profoundly important work, in which the great philosopher seeks to explain the basic problems of existence. A central influence on later philosophy, literature, art, and criticism—as well as existentialism and much of postmodern thought—*Being and Time* forever changed the intellectual map of the modern world. As Richard Rorty wrote in the *New York Times Book Review*, "You cannot read most of the important thinkers of recent times without taking Heidegger's thought into account." This first paperback edition of John Macquarrie and Edward Robinson's definitive translation also features a new foreword by Heidegger scholar Taylor Carman.
